5 Attorney for Plaintiff,
LIBERTY MEDIA HOLDINGS, LLC
6

7
8 UNITED STATES DISTRICT COURT

9 DISTRICT OF NEVADA, LAS VEGAS DIVISION

10 LIBERTY MEDIA HOLDINGS, LLC

Case No. 2:11-cv-00637

11 Plaintiff,

12 vs.

13
14 SWARM OF NOVEMBER 15 to
15 DECEMBER 9, 2010,
16 SHARING HASH FILE
AE340D0560129AFEE8D78CE07F2394C7
B5BC9C05; AND DOES 1 through 13,

17 Defendants.

18
19
20 **MOTION FOR EARLY DISCOVERY**

21 Plaintiff, Liberty Media Holdings (hereinafter “Liberty” or the “Plaintiff”) files this
22 Motion for Early Discovery (hereinafter the “Motion”) in the above-captioned case through its
23 counsel, Randazza Legal Group. Plaintiff seeks leave of this Court to discovery the identities of
24 Defendants John Does 1-13, which are essential to prosecuting the Complaint filed by Plaintiff in
25 this case (Doc. # 1). To effectuate this goal, Plaintiff seeks Court order allowing it to propound
26 discovery on Cox Communications for identifying information of the subscribers for the internet
27 protocol addresses used at the times specified in Exhibit 1, which were used to distribute
28 Plaintiff’s copyrighted work using the BitTorrent protocol.

1 **MEMORANDUM OF LAW AND POINTS OF AUTHORITY IN FAVOR OF**
2 **PLAINTIFF'S MOTION FOR EARLY DISCOVERY**

3 **I. Introduction**

4 Plaintiff Liberty Media Holdings (hereinafter, "Liberty") seeks the identities of all Doe
5 defendants from their respective Internet Service Providers ("ISPs"), and seeks a Court order
6 directing the ISPs to disclose the subscriber's personally identifiable information. The specific
7 information being sought from each ISP is found on Exhibit 1. Additionally, Plaintiff requests
8 permission to propound limited discovery in the form of interrogatories and depositions on any
9 individual identified by these ISP's in order to determine whether or not the actual Internet
10 subscriber is the proper defendant in this action.

11 **II. Factual Background**

12 Plaintiff Liberty is a California LLC doing business as CORBIN FISHER®. Liberty
13 produces, markets, and distributes adult entertainment products, including Internet website
14 content, videos, DVDs, photographs, etc. Plaintiff operates and maintains a website by and
15 through which individuals who pay a monthly subscription fee can view its photographic and
audiovisual works.

16 Defendant Does 1-13 are individuals whose true names and addresses are unknown to
17 Plaintiff. These Doe Defendants duplicated and distributed unauthorized and infringing copies
18 of Plaintiff's motion picture "Down on the Farm." Plaintiff has obtained the IP addresses
19 assigned to the individual Defendants, however, Plaintiff can only further identify the infringers
20 by way of further investigation. As such, the Plaintiff intends to subpoena the ISP in order to
21 determine the identity of the Internet subscriber who was assigned the corresponding IP address
22 on the date and time of infringement.

23 The information which Plaintiff will be requesting in the subpoenas issued to the ISPs is
24 governed by 47 U.S.C. § 551, which prohibits cable operators from disclosing personally
25 identifiable information pertaining to subscribers without the subscriber's express consent unless
26 there is "a court order authorizing such disclosure, if the subscriber is notified of such order by
27 the person to whom the order is directed." 47 U.S.C. § 551(c)(2)(B).

1 Accordingly, the Plaintiff requests that the Court issue the requisite Order instructing Cox
 2 Communications, Charter Communications and Clearwire Corporation to produce any and all
 3 documents and/or information sufficient to identify the user or users of their respective IP
 4 addresses as listed in Exhibit 1 during the corresponding dates and times.

5 Additionally, Plaintiff requests permission to conduct early discovery on each user identified
 6 by these ISPs in order to determine (without further motions) whether the actual subscriber
 7 performed the acts complained of, or whether it was some other individual with access to the
 subscriber's Internet connection.

8 **III. Argument**

9 ***A. The Federal Rules of Civil Procedure Allow Early Discovery in This Case.***

10 Federal Rules allow for discovery prior to a Rule 26 conference upon a showing of good
 cause. *See Semitool, Inc. v. Tokyo Electronic America, Inc.*, 208 F.R.D. 273, 275-76 (N.D. Cal.
 12 2002).

13 More specifically, courts have recognized that, “[s]ervice of process can pose a special
 14 dilemma for plaintiffs in cases like this in which the tortious activity occurred entirely on-line.”
Columbia Ins. Co. v. Seescandy.com, 185 F.R.D. 573, 577 (N.D. Cal. 1999). Accordingly, courts
 16 have developed the following factors to consider when granting motions for expedited discovery
 17 to identify anonymous Internet users: (1) whether the plaintiff can identify the missing party with
 18 sufficient specificity such that the court can determine that defendant is a real person or entity
 19 who could be sued in federal court; (2) all previous steps taken by the plaintiff to identify the
 20 Doe defendant; and (3) whether the plaintiff’s suit could withstand a motion to dismiss. *Id.* at
 21 578-80. Each of these factors resolves in favor of granting Plaintiff’s requested relief.

22 First, Plaintiff has sufficiently identified individuals who are real persons Plaintiff could sue
 23 in Federal Court. Plaintiff observed and documented infringement of its registered works by the
 24 individuals identified as Does 1-13 in the Complaint. The requested discovery is necessary for
 Plaintiff to determine the true name and address of the individuals who performed the infringing
 25 acts.

26 Second, there are no other practical measures Plaintiff could take to identify the Doe
 27 Defendants. Plaintiff is aware of no available information that would identify the infringing
 28

1 users, other than information maintained by their Internet Service Providers. Due to the nature
2 of on-line transactions, Plaintiff has no way of determining Defendants' identities except through
3 a third-party subpoena.

4 Third, Plaintiff has asserted *prima facie* claims for copyright infringement, contributory
5 copyright infringement, civil conspiracy, and negligence in its Complaint that can withstand a
6 motion to dismiss. Specifically, Plaintiff has alleged that a) it owns and has registered the
7 copyright in the work at issue and b) the Defendants made unauthorized reproductions of those
8 works and distributed them without Plaintiff's authorization. These allegations state a claim for
9 copyright infringement. Similarly, the Defendants knew of their infringement, and were
10 conscious of their uploading of Plaintiff's copyrighted work, and substantially participated in
11 others' infringement of the Plaintiff's copyrighted work, which would have been impossible
12 without Defendant's uploading and sharing of the file.

13 When outlining the above factors, the court in *Columbia* noted that in cases where injured
14 parties are likely to find themselves chasing unidentified tortfeasors from ISP to ISP, the
15 traditional enforcement of strict compliance with service requirements should be tempered by the
16 need to provide injured parties with a forum in which they may seek redress for grievances.
17 *Columbia*, 185 F.R.D. at 579. An analysis of the factors clearly demonstrates Plaintiff's
18 legitimate interest in identifying the name and address of the individuals who infringed upon its
copyrighted works.

19 A claim for civil conspiracy must allege (1) formation and operation of the conspiracy, (2)
20 wrongful act or acts done in furtherance thereto, and (3) the damage resulting from such acts.
21 *Jones v. AIG Risk Management*, 726 F. Supp 2d 1049, 1060 (N.D. Cal. 2010); See also *Chicago*
22 *Title Insurance Co. v. Great Western Financial Corp.* 69 Cal.2d 305, 316 (1968).

23 Here the purpose of the conspiracy is to traffic in infringing content. Defendants
24 downloaded the BitTorrent client for the purpose of conspiring with other BitTorrent users to
25 reproduce and distribute the Plaintiff's copyrighted work in violation of copyright laws. Each
26 defendant used the BitTorrent network for the purpose of reproducing and exchanging infringing
27 copies of the Plaintiff's copyrighted work in exchange for still more infringing content. As a
28

1 result of the unlawful duplication and distribution of its copyrighted work, the Plaintiff has
2 suffered damages to be determined at trial.

3 Additionally, Plaintiff's negligence cause of action will withstand a motion to dismiss.
4 Negligent conduct may be "a failure to do an act which is necessary for the protection or
5 assistance of another and which the actor is under a duty to do." Restatement 2d of Torts § 284.
6 Defendants failed to secure their Internet access, which by virtue of this unsecured access,
7 allowed the use of their Internet accounts to perform the complained of copying and sharing of
8 Plaintiff's copyrighted motion picture.

9 ***B. Plaintiff's Specific Requests for Identifying Information About the Doe Defendants Will
10 Make Identification and Service of the Defendants Possible.***

11 In addition to the three factors discussed above, courts have indicated that a plaintiff
12 requesting early discovery to identify defendants should justify specific requests and explain how
13 such requests "will lead to identifying information about defendant that would make service of
14 process possible." See *Columbia* 185 F.R.D. at 580; see also *Gillespie v. Civiletti*, 629 F. 2d 637,
15 642 (9th Cir. 1980).

16 The infringement and other wrongful acts at issue in this action occurred online. In order
17 to execute the illegal acts complained of, a user must connect to the Internet.

18 Individuals gain access to the Internet through an Internet service provider (ISP). When an
19 ISP provides Internet access to a subscriber, it does so through a modem located at the
20 subscriber's home or office. Each time the subscriber accesses the Internet, the ISP provides a
21 unique number to the subscriber called an Internet protocol (IP) address. This is somewhat akin
22 to a telephone number. The IP address for a subscriber may stay the same (a static IP address) or
23 it may change from time to time (a dynamic IP address). ISPs generally record the times and
dates it assigns each IP address to a subscriber.

24 Online technology used to engage in unlawful online theft relies on the ability to identify the
25 computers to and from which users search and exchange files. The technology identifies those
26 computers through the IP address from which the computer connects to the Internet. In this
27 manner, Plaintiff identified the IP addresses from which individuals connected to the Internet for
28 the purpose of unlawfully accessing Plaintiff's works, making electronic copies thereof, and

1 further distributing these works. Plaintiff recorded the exact date and time individuals used
2 various IP addresses to access the Internet to make illegally download, copy, and re-distribute the
3 Plaintiff's copyrighted work.

4 Anyone can perform a simple search on public databases to determine which Internet access
5 provider controls a specific IP address. Plaintiff now seeks to subpoena the above listed Internet
6 Service Providers to determine the name and address of the subscribers to whom they assigned
7 the various IP addresses recorded.

8 Plaintiff requests that the Court issue an order allowing Plaintiff to serve a subpoena on the
9 relevant Internet Service providers requesting specific subscriber information necessary to
identify the Doe defendants.

10 Since 47 U.S.C. §551 (The Cable Privacy Act) prohibits cable operators from disclosing
11 personally identifiable information concerning subscribers without the prior written or electronic
12 consent of the subscriber or a court order, and since some Internet service providers, including
13 those listed above in this motion, are also cable operators, Plaintiff requests that the Court order
14 state clearly that the Court contemplated the Cable Privacy Act and that the order specifically
15 complies with the Act's requirements. See, 47 U.S.C. §551.

16 Additionally, the Internet subscriber is not always the proper defendant in actions such as
17 this. Plaintiff therefore, seeks to depose and/or issue interrogatories to the Internet subscriber
18 identified by each ISP in order to determine whether or not they are the proper defendant in this
19 action. In the interest of judicial economy, the Plaintiff requests pre-authorization to conduct this
20 supplemental discovery.

21 Conclusion

22 The Plaintiff requests that the Court issue the requisite Order instructing Cox
23 Communications to produce any and all documents and/or information sufficient to identify the
24 user or users of the above IP addresses during the corresponding dates and times as shown in
25 Exhibit 1 hereto.

26 Plaintiff will only use this information to prosecute the claims made in its Complaint.
Without this information Plaintiff cannot pursue its lawsuit to protect its copyrighted works.

1 Such discovery should be conditioned on a) the ISPs having 7 calendar days after service of
2 the subpoenas to notify the subscriber that their identity is sought by Plaintiff, and b) each
3 subscriber whose identity is sought having 21 calendar days from the date of such notice to file
4 any papers contesting the subpoena.

5 Plaintiff additionally requests permission to engage in limited discovery by issuing
6 interrogatories and/or deposing the individuals identified by the ISPs in order to determine
7 whether or not the Internet subscriber is the proper defendant in this action.

8 Date: April 22, 2011
